EDUCATION

Bachelor of Arts - Data Science major, Environmental Studies minor

Expected May 2026

Macalester College, St. Paul, MN

GPA: 3.91

Relevant Coursework (Data Science): Introduction to Computer Science (Python), Introduction to Data Science (R), Computational Linear Algebra, Probability, Introduction to Statistical Modeling (R), Intermediate Data Science (R), Correlated Data, Bayesian Statistics, Data Structures (Java), Statistical Machine Learning (R)

Relevant Coursework (Environmental Studies): Environmental Economics, Climate Science, Climate Change Economics

SKILLS

Programming languages: R, Python, SQL, GIS, Slurm, Java, HTML, CSS, Javascript, D3

Software: Databricks, Tableau, PowerBI, Snowflake, Microsoft Office

Statistical methods: Time series modeling, longitudinal modeling, spatial modeling, bayesian modeling, (un)supervised machine learning, various regression techniques

RELEVANT EXPERIENCE

Teaching Assistant (*Intermediate Data Science, General R Preceptor*), Macalester College

September 2023-Present

- Empowered students to ask questions during office hours, ensuring that they felt comfortable and supported
- Attended class every day, helping lead lectures and working directly with students on activities during class
- Led seminars on topics in R, such as animation, parallel programming, and Python-R development
- Demonstrated exceptional communication skills when working the professor to address issues in the classroom

Data Science Intern, Aon Inc.

June 2025-September 2025

- Developed a Power BI dashboard reducing marketing campaign launch time from 12 to 2 weeks
- Utilized Snowflake and Databricks to query from large data sets and run complex machine learning models
- Independently learned PowerBI, Snowflake, Databricks, and SQL
- Demonstrated my ability to work directly with marketing strategists to translate data into actionable insights

Summer Research Assistant, Macalester College

May 2024-August 2024

- Co-wrote a paper on age heaping in surveys used to model child mortality in sub-Saharan Africa
- Ran a simulation study to investigate effects of age heaping on common modeling techniques
- Worked closely with the professor, developing strong collaboration and communication skills
- Refactored our code to run in parallel, using Slurm on a computing cluster to execute the simulation

LEADERSHIP AND ACTIVITIES

President, Macalester College Open Ultimate Frisbee

January 2024-Present

- Led 30-35 student athletes both on and off the field, building a successful ultimate frisbee program
- Developed necessary communication skills to lead practices, huddles, and outside team events
- Cultivated strong relationships with alumni to engage them in the team through events and fundraising
- Delegated tasks to other captains, empowering them to make essential contributions
- Organized a high school tournament for 3 years, building community and important connections

Ultimate Frisbee

- Player for the Minnesota Wind Chill, a professional ultimate frisbee team, for 2025-Present
- Selected to be a member of **Team USA U24** mixed, winning gold in 2025 in Logroño, Spain
- Volunteer coach and camp leader for several different organizations
